QA Testing Report — Website Evaluation

Prepared by: **Suraj Navgire** · ISTQB CTFL Certified QA Engineer
Target: <https://aivoa.ai> · Date: May 2026 · Environment: Web + Mobile

Executive Summary

18	12	6	18
Test Cases	Passed	Failed	Bugs Found

Manual QA evaluation of the Aivoa.AI website covering functional testing, form validation, responsive design, and UI/UX quality across desktop and mobile environments. Validation failures were the dominant bug category (12 out of 18 bugs), representing the primary security and data integrity risk. Mobile responsive issues were also significant, with layout breakage observed on multiple sections.

Test Cases

TC ID	Test Scenario	Expected Result	Actual Result	Status
TC-001	Verify 'Book a Free Demo' button opens demo form	Demo popup form should open successfully	Demo popup form opened successfully	Pass
TC-002	Verify user cannot submit empty form	Form should not submit and validation messages should appear	Validation messages displayed and form submission prevented	Pass
TC-003	Verify valid form submission	Form should submit successfully	Form submitted successfully	Pass
TC-004	Verify email field validation	System should display invalid email validation	Invalid email accepted successfully	Fail
TC-005	Verify mobile number field validation	System should reject invalid mobile number	Invalid mobile number accepted successfully	Fail
TC-006	Verify mandatory field validation	Mandatory field validation should appear	Validation messages displayed successfully	Pass
TC-007	Verify popup close functionality	Popup should close successfully	Popup closed successfully	Pass
TC-008	Verify form data persistence on accidental outside click	Form should warn user or preserve entered data	Popup closed and entered data was lost	Fail
TC-009	Verify 'Why AI?' header navigation	Page should navigate to 'Why AI?' section successfully	Successfully navigated to 'Why AI?' section	Pass
TC-010	Verify 'Platform' header navigation	Page should navigate to 'Platform' section successfully	Successfully navigated to 'Platform' section	Pass
TC-011	Verify 'How It Works' header navigation	Page should navigate to corresponding section successfully	Successfully navigated to corresponding section	Pass
TC-012	Verify 'Modules' header navigation	Page should navigate to Modules section successfully	Successfully navigated to Modules section	Pass
TC-013	Verify 'Case Studies' header navigation	Page should navigate to Case Studies section successfully	Successfully navigated to Case Studies section	Pass
TC-014	Verify 'Pricing' header navigation	User should navigate to Pricing section/page successfully	Successfully navigated to Pricing section/page	Pass
TC-015	Verify 'Contact Us' header navigation	User should navigate to Contact Us section successfully	Successfully navigated to Contact Us section	Pass

TC ID	Test Scenario	Expected Result	Actual Result	Status
TC-016	Verify application logo navigation	User should navigate to homepage/top section	No navigation occurred after clicking logo	Fail
TC-017	Verify responsive layout on mobile devices	Layout should remain responsive without UI breakage	Multiple alignment and responsive UI issues observed	Fail
TC-018	Verify pinch zoom responsiveness	No extra white space or layout break should appear	Large blank white space appeared and layout broke	Fail

Bug Report
